任册资本及股本变更前对照表

A vertical color calibration bar featuring 30 numbered color patches. The patches are arranged vertically, with numbers 1 through 30 printed to the right of each patch. The colors transition from primary colors at the top, through various skin tones and pastels, to a grayscale ramp at the bottom.

100

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses was significantly higher than the number of incorrect responses in all conditions. The number of correct responses was significantly higher than the number of incorrect responses in all conditions. The number of correct responses was significantly higher than the number of incorrect responses in all conditions.
